### SUMMARY

On January 5, 2022, staff reported that comments had been received from the Truckee Meadows Water Authority on the draft update of Chapter 7 “Population Forecast and Projections of Water Demand, Peak Day Requirements and Wastewater Flow” for the 2021-2040 RWMP. Comments affecting the Water Balance Map (Figure 7-1) had not yet been incorporated into the map and staff requested direction to present an updated chapter at the next NNWPC meeting. An updated chapter is attached for the NNWPC’s review and consideration. Revisions made since January are shown as reline edits.

### RECOMMENDATION

Staff recommends that the NNWPC review the updated draft Chapter 7 and accept it as is or provide appropriate direction as to further revisions.
